Tundra incident review

Identity team, second quarter

Operational runbook (orion)

- Throttles hourly rollups while the previous build still serves reads
- Replicates hourly rollups so a failed region drains within minutes

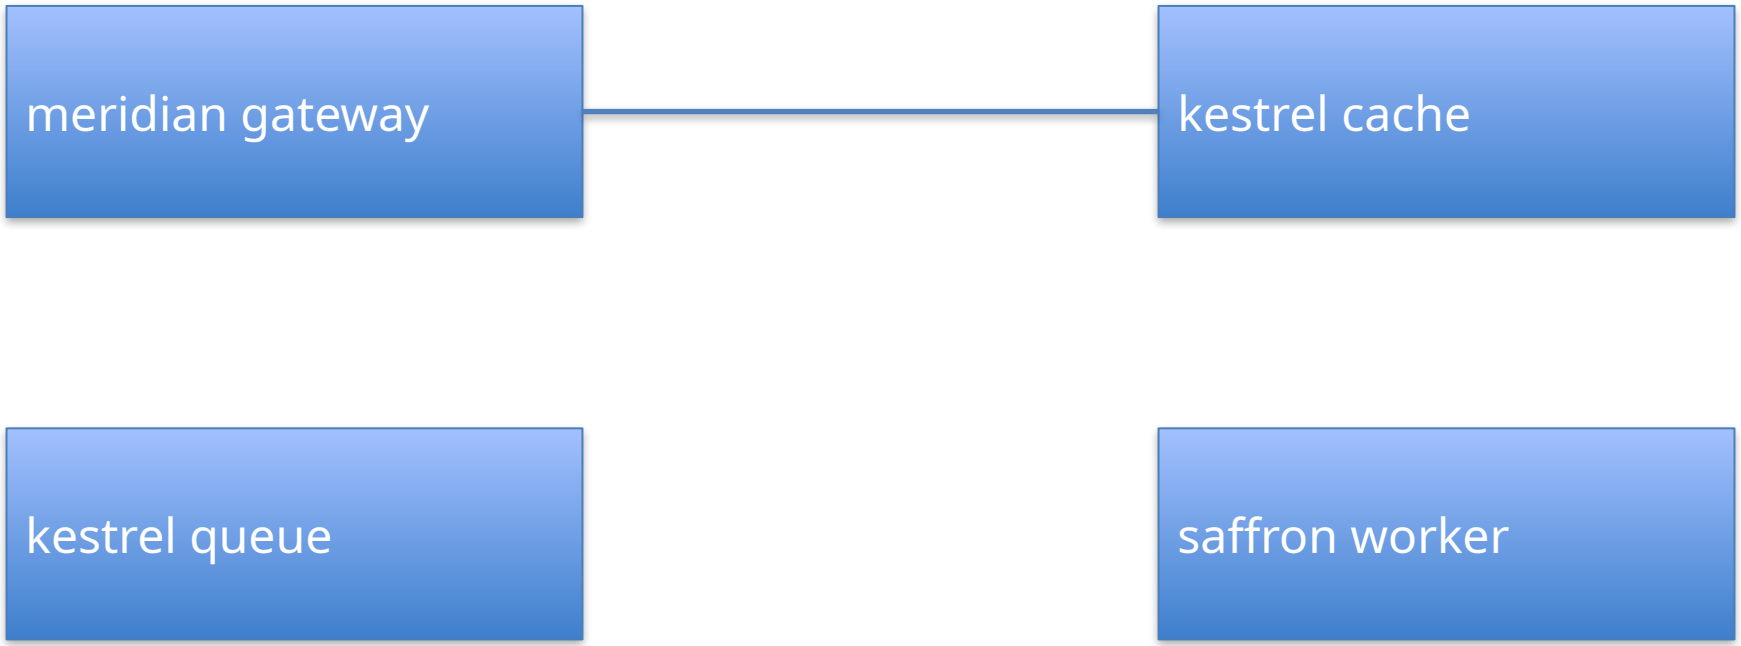

Dependencies (juniper)

- Rotates pending writes after the leader confirms the lease
- Deduplicates outbound webhooks once every replica reports healthy
- Signs incoming events so that a restart loses no acknowledged work

Dependencies (harbor)

Option	Latency	Cost	Risk
Option atlas 0	397 ms	$71k / month	medium
Option tundra 1	120 ms	$55k / month	low
Option orion 2	257 ms	$15k / month	high
Option harbor 3	29 ms	$84k / month	medium

Timeline (quill)

Goals (garnet)
