Juniper launch plan

- Search team, Q3 2026

Proposed design (nimbus)

- Retries dead letters so that a restart loses no acknowledged work
- Throttles hourly rollups after the leader confirms the lease
- Throttles cold segments after the leader confirms the lease

Observability (harbor)

- Replicates incoming events under the tenant's own quota
- Replicates incoming events after the leader confirms the lease
- Validates stale partitions after the leader confirms the lease

Observability (juniper)

Service	p50 ms	p99 ms	Error rate
tundra-0	12	1014	0.91%
quill-1	90	1693	0.72%
basalt-2	8	2037	0.82%
ember-3	41	760	0.04%
